Type: ROUTINE INSPECTION  
Date: 14-MAY-2025

---

### 3.125(a) Critical

#### Facilities, general.

In the morning of 26 April 2025, a male fallow deer "Timmy" was found dead in a pen where no other animals were housed. His head and neck were caught in a loop of metal chain hanging from the fence, which held open a gate when in use. The facility suspects the cause of death to be strangulation. The facility made corrections to the rest of the primary enclosures by shortening the loops of chain to prevent animal body parts becoming caught up in them. Failure to maintain housing facilities that are structurally sound may result in severe injury or death to animals. The indoor and outdoor housing facilities shall be structurally sound and maintained in good repair to protect the animals from injury and to contain the animals.

Correct from this date forward of 16 May 2025.

This inspection and exit interview were conducted with the licensee.
