

## Inspection Report

City Of Chippewa Falls  
30 W Central St  
Chippewa Falls, WI 54729

Customer ID: **2920**  
Certificate: **35-C-0015**  
Site: 001  
IRVINE PARK

Type: ROUTINE INSPECTION  
Date: 23-AUG-2016

### 2.131(c)(1)

#### HANDLING OF ANIMALS.

The public can walk along the enclosure housing the yaks. At the time of this inspection the male yak was observed to ram his head at the enclosure fence when members of the public were present. On one occasion he managed to get the tip of his right horn through one of the open links of the chain link fence. The yak could potentially injure a person while ramming at the fence. Ensure the safety of the public with sufficient barriers or distance between the animal enclosure and the public walkway. Correct by August 31, 2016.

### 3.131(d)

#### SANITATION.

Two chipmunks were observed to scurry away from the feed bin located by the truck garage and areas of urine staining and fecal pellets were also observed on and around the feed bin. The presence of chipmunks, combined with the areas of visible excreta indicate that rodent pests have access to the feed bin and may be contaminating the food contained within. Establish a pest control system that prevents the rodents from having access to the feed bin. Correct by August 31, 2016.

Exit briefing conducted with facility representatives.

This is an electronic version of the inspection report dated August 23, 2016 and provided to the licensee on August 24, 2016.
