Type: ROUTINE INSPECTION

Date: 14-MAR-2019

### 2.126(a)(2)

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

\*\*\* The required records of animals on hand and written agreement with the part time attending veterinarian were not able to be located during the inspection process for review by the inspector. Records required must be available for APHIS inspector review.

Correct by: March 30, 2019

### 3.125(a)

#### FACILITIES, GENERAL.

\*\*\* The chain link gate in the largest stall in the barn is in disrepair. There is a large hole in the bottom half of the gate that has sharp protruding wires. The top portion of the gate is also broken with protruding wires. This gate needs to be replaced for the safety of the animals.

Correct by: March 20, 2019

### 3.131(c) REPEAT

#### SANITATION.

\*\*\* Currently there is a pig, sheep and goat living in the main house with the owner in the bedroom and bathroom area. Although there are designated pens for the animals, the areas surrounding the animals are cluttered with miscellaneous items (buckets, coffee containers, excess blankets). The premises around the animals need to be kept clean to promote good husbandry practices.

\*\*\* There is excess trash and clutter being stored next to the pig stall in the barn that needs to be removed. Any accumulations of trash in the winter months must be in a designated area and cleared on a routine basis for the health of the animals.
