2571 Siegrist Road
RONKS, PA 17572

Customer ID: **508122**
Certificate: **23-A-0727**
Site: 001
OMAR ESH

Type: ROUTINE INSPECTION
Date: 12-APR-2022

3.25(a)

Facilities, general.

There was an opened floor panel approximately 1 foot wide by 3 foot long on the front section of the guinea pig trailer to allow fresh air. The open floor panel does not prevent other animals such as rodents from entering, nor does it prevent any loose guinea pigs from escaping through the floor and falling to the ground outside the trailer. Housing facilities must be structurally sound to protect the guinea pigs from injury, prevent guinea pigs from escaping, and restrict other animals from entering the trailer. The opened floor panel must be closed or covered with a material that prevents guinea pigs from escaping and restricts other animals from entering the trailer. Correct by April 23, 2022.

3.30

Watering.

There was a buildup of dirt and debris around the base of the water valves, wire mesh supporting the valves, and drainpipe below the water valves. The buildup of dirt and debris can increase the risk of bacterial and fungal diseases. Licensee must ensure that water valves and devices are sanitized when dirty to prevent health risks to the guinea pigs. Correct by April 22, 2022.

This inspection was conducted on 4/12/22, and the exit interview was conducted with the licensee on 4/21/22. The delay in delivering and conducting the exit interview was due to computer software issues.
