City Of Alamogordo
1376 East 9th Street
Alamogordo, NM 88310

Customer ID: **3484**
Certificate: **85-C-0003**
Site: 001
CITY OF ALAMOGORDO

Type: ROUTINE INSPECTION
Date: 28-JAN-2025

2.75(b)(1)

Records: Dealers and exhibitors.

At the time of inspection, the licensee did not have disposition records for two adult nanday parakeets and four adult bar-headed geese that are no longer at the facility.

Records containing the required information for animals disposed of or acquired for use in regulated activities, including those offspring born on premises, are necessary to accurately track animals to ensure their humane care and use. The licensee shall make, keep and maintain records of acquisition and disposition of all animals that fully and correctly disclose the required information.

TO BE CORRECTED FROM THE DATE OF THIS INSPECTION ON JANUARY 28, 2025

3.127(d)

Facilities, outdoor.

There are sections of the perimeter fence that are in poor repair, with sagging wire strands at the top; one section measured a height of 80", which is less than the required 96" height for the species kept on the premises. The fence is inadequate because it cannot serve as a sturdy, secondary containment system for all of the animals housed at the facility and may not be able to prevent other animals and unauthorized persons from entering where damaged. The licensee must assess all perimeter fences at the facility for adequate height and structural integrity and modify the existing fence(s) or install a different perimeter fence or fences of at least 8 feet in height. The perimeter fence(s) must be a minimum of three feet from the primary enclosures and constructed so that the fence(s) protect(s) the animals by restricting entry of outside animals and unauthorized persons from going through it, or under it, or having contact with the animals in the facility.

TO BE CORRECTED BY MARCH 1, 2025

3.153(a)(1)(ii)

Primary enclosures.

In the primary enclosure housing one adult male and three adult female grey junglefowl, there is an electrical cord from a heating lamp that extends into the enclosure and is accessible to the birds.

Unshielded electrical wires pose a risk for injury to the birds from shock or entanglement. The licensee must ensure that primary enclosures are constructed and maintained so that they protect the birds from injury.

TO BE CORRECTED BY FEBRUARY 5, 2025
