South Lyon, MI 48178

Customer ID: **19378**
Certificate: **34-C-0317**
Site: 001
CAROUSEL ACRES INC

Type: ROUTINE INSPECTION
Date: 11-JUN-2024

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There were at least five goats that have overgrown toes on both the front and rear feet. Without proper care of the goats feet there can be permanent damage to the joints that can cause pain and an abnormal gait.
Each exhibitor shall establish and maintain programs of adequate veterinary care that include The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.
To be corrected by end of business June 14, 2024

3.125(a)

Facilities, general.

The three fox in a single enclosure have dug holes that have exposed the buried ground fence leaving space below the fencing.
The exposed fence with space below can become a foot trap that can cause injury to the foxes in the enclosure. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.
To be corrected by end of business June 14, 2024

3.152(b)

Facilities, outdoor

The newly constructed primary enclosure housing two peacocks does not have any shade structure. Shade must be provided to ensure the peacocks are not heat stressed.
Shelters must be adequately ventilated in hot weather and have one or more separate areas of shade or other effective protection that is large enough to comfortably contain all the birds at one time and prevent their discomfort from direct sunlight, precipitation, or wind.

Inspection Report

The primary enclosure housing to emus has a water container that is surrounded by water and mud with a green organic material growing on top of the water and mud.

Clean, dry access to water must be provided to all birds to ensure they are drinking an appropriate amount of water to maintain the health of the emus and to prevent disease.

Potable water must be provided in sufficient quantity to every bird housed at the facility, unless restricted by the attending veterinarian. If potable water is not continually available to the birds, it must be offered to them as often as necessary to ensure their health and well-being. Water receptacles must be kept clean and sanitized in accordance with § 3.158 as often as necessary to keep them clean and free of contamination. Used water receptacles must be cleaned and sanitized before they may be used to provide water to birds maintained in a separate enclosure. Group-housed birds must have multiple water receptacles where needed to ensure that all birds have access to sufficient water.

To be corrected by June 14, 2024

This inspection and exit interview were conducted with a facility representative.
