Environment enhancement to promote psychological well-being.

The facility provides enrichment for the birds but a written environmental enhancement plan for birds that documents the appropriate provisions to provide enrichment and special considerations and is approved by the attending veterinarian has not been developed by the facility.

Failure to document an environmental enhancement plan can result in birds not receiving adequate enrichment which can lead to behavior, social, health, and other psychological problems.

Facilities must develop, document, and follow an environment enhancement plan to promote the psychological well-being of the birds.
