Terrill Al-Saihati
15672 South Avenue 1 E
Yuma, AZ 85365

Customer ID: **3826**
Certificate: **86-C-0102**
Site: 001
TERRILL AL-SAIHATI

Type: ROUTINE INSPECTION
Date: 09-OCT-2019

3.127(c) REPEAT

FACILITIES, OUTDOOR.

There were pools of standing water around the water receptacles in the following enclosures; one containing one zebra and one donkey, one containing two camels, and one containing four goats. The animals were unable to drink from the receptacles without standing in the water and mud. Standing mud and water can be a source of intestinal diseases and foot infections to the animals. A suitable method shall be provided to rapidly eliminate excess water.

3.131(d) REPEAT

SANITATION.

There were many flies within an enclosure housing one coati. The flies were swarming on the animal's food and feeding platform. These insects can potentially transmit bacteria, viruses, and parasites that can have a negative impact on the health and well-being of the animals. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

This inspection and exit interview were conducted with a facility representative.
