HOOSIER CAMEL ENCOUNTER LLC

Type: ROUTINE INSPECTION

Date: 15-JAN-2020

### 3.131(a)

#### SANITATION.

The shelter for the farm animals, including a llama, several goats, and a miniature horse, is too dirty. In the shelter, the entire cement floor is covered with a few inches of moist manure. The animals cannot bed down without becoming contaminated. This exposes the animals to disease hazards. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.
