WILD THINGS ZOOFARI INC.

Type: ROUTINE INSPECTION
Date: 30-APR-2018

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

One cavy was observed holding up his left front leg. The licensee stated the animal began to limp a few weeks ago but last week after an interaction with a woodchuck he began to hold the leg up. The animal needs to be examined by a veterinarian to determine proper treatment. The licensee communicated with the attending veterinarian when it first occurred. The veterinarian was called at time of the inspection and a vet exam has been scheduled for Tuesday evening.

CORRECT BY : 5/1/18

3.125(a)

FACILITIES, GENERAL.

A perch in the coati enclosure is broken and a large screw is exposed.

There is a jagged piece of metal flashing by the gate in the enclosure housing the porcupine and warthog. These are potential areas for injury to the animals and must be repaired or replaced and maintained in good condition to prevent injury .

CORRECT BY : 5/8/18

3.127(d)

FACILITIES, OUTDOOR.

The 2 adult red kangaroos are housed behind a 5 foot chain link fence. Animals such as kangaroos require a 6 foot perimeter fence surrounding their primary enclosure. The perimeter fence serves as a secondary containment fence and restricts the entrance of unwanted animals and people. A request for a variance may be sent to the animal care specialist for review or the kangaroos must be housed within a 6 foot perimeter fence.

CORRECT BY : 5/30/18

The inspection and exit briefing was conducted with the owner.
