

Inspection Report

City Of Dodge City
Post Office Box 880
Dodge City, KS 67801

Customer ID: **4089**
Certificate: **48-C-0140**
Site: 001
CITY OF DODGE CITY

Type: ROUTINE INSPECTION
Date: 01-JUN-2015

3.75(a)

HOUSING FACILITIES, GENERAL.

There is a wire mesh shelf in use in the outdoor portion of the ring-tailed lemur enclosure. A portion of this wire mesh has come loose from the support and is creating a gap. This sagging mesh could cause injury to the lemurs. All surfaces must be maintained and kept in good repair to protect the animals from injury. Correct by 14 June 2015.

3.125(a) REPEAT

FACILITIES, GENERAL.

The badger has dug a hole in it's enclosure next to the concrete/metal tunnel that leads to it's den. This hole could cause injury to this animal. All surfaces must be maintained in good repair to protect animals from injury.

3.127(c)

FACILITIES, OUTDOOR.

There is standing water and mud in the west outdoor portion of the bear enclosure. There is an accumulation of mud at the egress door to the sheltered portion of this enclosure. The bear was observed to go from the sheltered portion to this outdoor portion and purposefully avoided the mud by stretching out onto a log and concrete footing. Standing water and mud may increase disease transmission and make it difficult for the animal to enter and exit the shelter. A suitable method must be established to rapidly eliminate excess water. Correct by 8 June 2015.

This was a facilities only inspection.

This routine inspection was conducted on 1 June 2015 with a facility representative and Dr. Margaret Shaver, VMO. The exit interview was conducted on 2 June 2015 with a facility representative and Dr. Margaret Shaver, VMO.

Additional Inspectors

Shaver Margaret, Veterinary Medical Officer
