KENYA AIRWAYS PLC

JFK AIRPORT, TERMINAL 4, CONCOURSE ROOM 275.148
JAMAICA, NY 11430

Customer ID: **504964**

Certificate: **21-T-0108**

Site: JFK

KENYA AIRWAYS PLC

Type: ROUTINE INSPECTION

Date: 28-NOV-2023

3.162(a)(1)

Primary enclosures used to transport live birds.

On November 8, 2023, 6 crates of birds (black-casqued hornbills, white-thighed hornbills, and turacos) arrived at John F. Kennedy International Airport (Queens, New York) from Jomo Kenyatta International Airport (Nairobi, Kenya) on flight KQ555 (AWB# 70650852966).

One of the crates containing black-casqued hornbills was damaged upon arrival. The double metal mesh of the crate had a circular hole, approximately 10 inches in diameter, which allowed 1 hornbill to escape within the cargo space of the plane. The bird was captured and secured back into its original crate. The crate was temporarily fixed for transport with a clip board and bungy cords.

Primary enclosures used for transporting birds must be strong enough to contain the bird securely and comfortably and to withstand the normal rigors of transportation.

This inspection and exit interview were conducted with cargo facility and airline representatives.
