Gypsum, KS 67448

Customer ID: **12658**
Certificate: **48-A-2111**
Site: 001
Hallie Ade

Type: ROUTINE INSPECTION
Date: 09-DEC-2015

2.50(a)(2) REPEAT

TIME AND METHOD OF IDENTIFICATION.

* Three young dogs less than 16 weeks in age and weaned did not have official identification on them at time of facility inspection. The three young dogs are being housed in outdoor housing. The licensee is using microchips as the official identification. Official identification is needed to ensure that each animals identity can be known with certainty and to facilitate the inspection process. The licensee must ensure that all animals less than 16 weeks of age shall be identified by official tag, a distinctive and legible tattoo or a plastic-type collar acceptable to the Administrator.

3.1(c)(2) REPEAT

HOUSING FACILITIES, GENERAL.

* Two sheets of plywood are showing bare, chewed wood with a roughened, splintered edge. Four dogs are in contact with the plywood sheets located in outdoor housing. Surfaces not maintained on a regular basis could lead to potential unsanitary conditions, disease or health risks because they cannot be readily cleaned and sanitized. The licensee must ensure all surfaces are maintained on a regular basis and if any surface cannot be readily cleaned and sanitized it must be replaced when worn or soiled.

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

* Several pieces of chewed plastic were observed accumulating in one outdoor enclosure housing two dogs. Keeping the premise free of trash, junk, high grasses and discarded matter is necessary for the welfare of the dogs. The licensee must ensure that the premise, buildings and surrounding grounds must be kept free of accumulations of trash, junk, waste products and discarded matter at all times. Correct by 12/23/15.

* The facility inspection and verbal exit briefing done on 12/9/15 were conducted with the licensee, Karl Thornton ACI and Robert Bacon ACI.
