Type: FOCUSED INSPECTION
Date: 14-MAR-2023

2.32(a)

Personnel qualifications.

On Saturday June 25th, 2022, a macaque on an IACUC approved protocol received 298 mL of fluid through various fruits while training with a laboratory staff member. According to facility representatives, the laboratory staff member prepared the bottle of water that was required by the protocol but did not provide it at the end of the training session. It was assumed that another person would give the water bottle to the macaque. The laboratory member was supposed to contact the LAR veterinary staff and inform them that the bottle was not provided, so that another staff member could provide the water bottle. The laboratory staff immediately reported the incident to LAR veterinarians and submitted a report to the IACUC. On June 26th, 2022 the macaque was reviewed by an LAR veterinarian and provided water. According to medical records, the macaque was not dehydrated.

It shall be the responsibility of a research facility to ensure that all scientists, research technicians, animal technicians, and other personnel involved in animal care, treatment, and use are qualified to perform their duties. This requirement ensures that laboratory staff follow the IACUC approved protocols and that research animals receive proper care.

A corrective action plan and retraining of laboratory staff was completed before the time of inspection.
