

Inspection Report

Prescott Animal Park Assn.
1403 Heritage Park Rd.
Prescott, AZ 86301

Customer ID: **3452**

Certificate: **86-C-0082**

Site: 001

PRESCOTT ANIMAL PARK ASSOCIATION

Type: ROUTINE INSPECTION

Date: 02-NOV-2016

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***A pig in the domestic interactive area walked with an abnormal gait. It did not walk with a smooth motion, but instead appeared to drag its hind limbs each time it stepped with either leg. The hooves on both front and hind legs were excessively long, extending out three to four inches to the point that they were curling causing the toes to rotate up and heel to drop. Failure to appropriately maintain hooves/nails can cause gait abnormalities which could be painful or cause injuries. As part of the facility's programs of preventative veterinary care, the licensee must ensure that all animals receive appropriate hoof and nail care in a timely manner.

To be corrected by 11/11/16.

3.50(a)

FACILITIES, GENERAL.

***The wire mesh lining on the bottom of the rabbit enclosure is exposed with twisted sharp ends. Failure to maintain facilities, including enclosures, poses a risk of injury to the animals. Housing facilities for rabbits shall be structurally sound and shall be maintained in good repair, to protect the animals from injury, to contain the animals, and to restrict the entrance of other animals.

This was corrected during the inspection.

3.81 REPEAT

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

***An environmental enhancement plan to promote the psychological well-being of the nonhuman primates currently housed at this facility is still incomplete. The plan, at a minimum, must address each of the following: social grouping, environmental enrichment, special considerations, restraint devices and exemptions, when applicable.

Currently, the plan made available during inspection, only addresses environmental enrichment. The plan must be completed, in accordance with the currently accepted professional standards as cited in appropriate professional journals or reference guides, and as directed by the attending veterinarian.

Inspection Report

3.127(a)

FACILITIES, OUTDOOR.

***The shelter/shade structure in the enclosure housing the bobcats is in need of repair or replacement. The structures wood is falling apart and is structurally unsound. Structurally unsound structures pose a risk of injury to the animals. The affected structures must be repaired or replaced. Housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

To be corrected by 11/11/16.

This inspection and exit interview were conducted with Zoo Executive Director.
