Type: ROUTINE INSPECTION
Date: 01-DEC-2022

2.75(b)(1)

Records: Dealers and exhibitors.

The facility seasonally acquires goats and then returns them at the end of the season. There are no acquisition records for the six goats currently at the facility. Acquisition records are required to be maintained at the facility identifying where the animals originated from, and the date they arrived. This needs to be addressed and these animals added to the records of animals on hand.

Correct by: Dec 5, 2022

2.126(b)

Access and inspection of records and property; submission of itineraries.

At the time of the inspection, the program of veterinary care and the current records of animals on hand could not be located for the APHIS official to review. These records are an important aspect of the license and must be maintained in a location that is accessible to the inspector during the routine inspection process.
