Type: ROUTINE INSPECTION
Date: 10-OCT-2017

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The kennel outdoor washdown had an excessive accumulation of feces and urine. A collection of hair was also noted under the slatted floor. An odor and increased insect activity was noted around washdown area. The washdown must be cleaned as often as necessary to prevent the accumulation of feces and food waste as well as reduce disease hazards such as pests, insects and odors. Correct by October 12th 2017 by cleaning the washdown area as often as necessary to keep the area in an acceptable manner.

The dogs identified as microchip numbers ending in 4339, 5290 and 6347 on the last inspection all had received appropriate treatment. The female King Charles Cavalier with no identification that had come in from an outside source was returned to the owner.

This inspection and exit interview were conducted with the licensee's wife
