Kenney Hall 44-320
Tuskegee Inst, AL 36088

Customer ID: 857
Certificate: 64-R-0002
Site: 001
TUSKEGEE UNIVERSITY

Type: ROUTINE INSPECTION
Date: 15-JUN-2017

3.125(a)

FACILITIES, GENERAL.

** The paddock containing a horse at the bottom of the hill below the large animal clinic fencing is in disrepair. The actual fencing is away from the fencing posts and there was a thick piece of wire with a gap between it and the fence. This is an area where the horse could get its leg caught and potentially injure itself. To the right of this post there is a piece of that same wire sticking away from the post. The animal could easily impel itself with this metal. The outdoor enclosure should be in good repair to prevent injury to the animals it contains. Correct by 7/15/2017

3.125(c) REPEAT

FACILITIES, GENERAL.

** In the stall containing feed, in the cow barn, part of the hay was scattered around the pallets on the floor and the hay on pallets was up against the the wall not allowing air flow around it. Also there was a bag of sweet feed that was open. The hay should be elevated and away from the walls to promote good air flow to prevent molding. Feed should be contained properly to prevent contamination and spillage of feed and hay should be removed or cleaned up to prevent and minimize pest.

This inspection and exit interview were conducted with Attending Veterinarian.
