

## Inspection Report

City Of Clay Center  
Post Office Box 37  
Clay Center, KS 67432

Customer ID: **4099**  
Certificate: **48-C-0017**  
Site: 001  
City of Clay Center

Type: ROUTINE INSPECTION  
Date: 31-MAY-2016

### 2.40(b)(2) REPEAT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An adult red fox was observed scratching at its head/ear area and underside of the neck and rubbing its body against the chain link fence consistently for about 5 minutes. This animal is molting and while patchy hair loss is commonly seen during a molt, there appears to be excessive hair loss and visible skin along the right side of the body and hip bones by the head of the tail. Molting is common at this time of the year but excessive scratching and hair loss in patterns not expected with molting can indicate problems such as infection, parasites, and other medical problems. The licensee must have this animal examined by a licensed veterinarian to determine if this is normal molting or to ensure that an accurate diagnosis is obtained and that an appropriate treatment plan is developed and followed. The licensee must document the outcome of this consultation and make it available to the inspector upon request.

### 3.75(e)

#### HOUSING FACILITIES, GENERAL.

An open bag of wood shaving bedding for the two ring-tailed lemurs was found in the area housing these animals. Open bedding can be contaminated by rodents or other pests that can carry disease. Open food and bedding supplies must be kept in leakproof containers with tightly fitting lids to prevent spoilage and deterioration. Correct by 3 June 2016.

### 3.125(a)

#### FACILITIES, GENERAL.

A small area of metal support pipe in the shelter structure in the bear enclosure has deteriorated and has a sharp edge. Deteriorating metal can cause injury to this animal and may be structurally unsound. The licensee must ensure that the facility is constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect these animals from injury and to contain the animals. To be correct by 30 June 2016.

Prepared By: MARGARET SHAVER, D V M USDA, APHIS, Animal Care
