El Zaribah Shrine
552 N. 40th Street
Phoenix, AZ 85008

Customer ID: **3443**
Certificate: **86-C-0091**
Site: 001
EL ZARIBAH SHRINE

Type: ROUTINE INSPECTION
Date: 06-FEB-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***A male camel was noted to be in thin body condition such that his hip bones and back bone were more prominent. The camel also had 2 small circular areas of hair loss (1 viewed from the back right, 1 viewed from the back right side) that appeared to be scabbed over sores on the right hip. The facility representative stated he had noted the camel seemed thin but was eating well. The facility representative attributed the thin body condition to old age (the camel is approximately 16 years of age). The attending veterinarian had not been contacted nor had any other actions been taken to address the loss of body condition despite a normal appetite. Thin body condition can be an indication of an underlying disease. This animal must be seen and evaluated by a licensed veterinarian, with written diagnosis, treatment, and follow-up plans, no later than 2/14/2014.

3.125(a)

FACILITIES, GENERAL.

*** The chain link fencing of the enclosure housing 2 camels (1 female, 1 male) at the bottom is turned up and in with sharp points in several places. The fencing material was not maintained in good repair to protect the animals from injury.

To be corrected by 2/21/2014

Exit interview was conducted on-site with a facility representative.
