Certificate: 52-R-0113  
Site: 001  
REVIVICOR INC

Type: ROUTINE INSPECTION  
Date: 07-MAY-2014

### 2.36(b)(4)

#### ANNUAL REPORT.

The annual report for 2013 does not report the address of the facility where the animals are housed. The annual report for all research facilities must state the location of all facilities where animals were housed, used in actual research, or held for these purposes. An amended report must be filed which includes the required information. Compete by June 7, 2014

### 3.125(a)

#### FACILITIES, GENERAL.

In trailer 18, the flooring panels have separated in one of the pens (last one on the left) creating a gap large enough to cause injury to an animal that gets its foot caught in the gap. The animal in that pen (#667) has a mild abrasion on a hind foot at the point where the nail meets the skin which could have been caused by the flooring.

Facilities must be maintained in a manner that prevents injuries to animals.

The flooring was repaired prior to the conclusion of the inspection. All similar housing should be checked to ensure that there are no other flooring gaps.

An exit interview was conducted with a facility representative.
