Facilities, general.

Sometime overnight on September 28, 2022, the porcupine, 'Sara', escaped her primary enclosure and dug under the perimeter fence to escape the facility. Facility representatives attempted to locate her, and later that morning she was found and safely retrieved with no injuries.

Housing facilities that are not constructed and maintained in good repair to safely contain the animals can lead to escape and possible stress, injury, or death of the animal, or injury to the public. Correct by ensuring facilities and enclosures are constructed in a manner that contains the animals and protects them from injury. Enclosure was corrected prior to the inspection.

This inspection and exit interview were conducted with facility representatives.
