Site: TRA
VOGEL S EXOTICS

Type: ROUTINE INSPECTION
Date: 12-OCT-2024

3.80(b)(1)

Primary enclosures.

An approximately 6 year old male ring-tailed lemur named "George" was in an enclosure that was 24 inches in height. The facility representative felt this lemur weighed somewhere between 2.5-5 lbs. Given the approximate weight of the lemur, the lemur is required to have an enclosure that measures 30 inches in height. Not having an enclosure that is of sufficient height could cause stress for the animal. The animal must be housed in a primary enclosure that meets the height requirement for its weight. Correct by 10/13/24.

This inspection and exit interview were conducted with the facility representative.

End of report.
