PITTSBURGH, PA 15206

Customer ID: **2241**

Certificate: **23-C-0009**

Site: 001

ZOOLOGICAL SOCIETY OF  
PITTSBURGH

Type: ROUTINE INSPECTION

Date: 05-JAN-2021

---

### 3.84(d)

#### **Cleaning, sanitization, housekeeping, and pest control.**

There were two live mice observed in the indoor blue monkey enclosure, and one live mouse observed in the indoor colobus enclosure. These netted enclosures are surrounded by natural substract and live vegetation which can allow for the harborage of rodents. The facility stated that they are actively trapping pests, however, their current program does not appear to be effective in these animal areas. Failure to maintain an effective program to control mammalian pests can have a negative impact on the the health of the animals through the spread of disease or contamination of animal areas and feed. The licensee must correct by implementing an effective pest control program in all animal areas.

Correct by : February 8, 2021.

This inspection was conducted with the curatorial, animal health, & husbandry staff.

The exit interview was conducted with the Pittsburgh Zoo President & CEO.

Additional Inspectors:

RANDALL COLEMAN, ANIMAL CARE INSPECTOR
