Certificate: **21-T-0431**
Site: IAD
Air China Cargo- IAD Station

Type: ROUTINE INSPECTION
Date: 26-SEP-2024

2.134

Contingency planning.

The carrier has not developed and documented a contingency plan. A plan is important to be prepared for potential disasters or emergencies that could affect the health and well-being of the animals in transport. The contingency plan should include a detailed strategy to address the needed handling, treatment, transportation, housing, and care of the animals in the event of an emergency or disaster. Correct by developing and documenting an appropriate contingency plan available for review upon USDA inspections.

This inspection and exit interview were conducted with a facility representative.
