Zoo Two U Llc  
82089 Hwy 25  
Folsom, LA 70437

Customer ID: **321610**  
Certificate: **72-C-0213**  
Site: 001  
Zoo 2 U, L L C

Type: ROUTINE INSPECTION  
Date: 12-APR-2018

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A written program of veterinary care was not available for review at the time of this inspection. A formal relationship with a veterinarian is very important for the health and well being of the facility animals. The veterinarian should be involved in all aspects of animal care including decisions on frequency of routine health visits to the facility by the veterinarian, determining preventative health protocols for the animals, and consultations concerning problems with the animals' health, behavior, husbandry and diet. A document generated by the veterinarian outlining their plan to accomplish the above functions needs to be available for review during USDA inspections.

Correct by: June 21, 2018

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

At the time of inspection, a bobcat was observed sitting in her enclosure with a hunched over posture. The bobcat's eyes were squinted and tongue was exposed as if she were breathing rapidly. The bobcat appeared to be showing signs of pain and/or distress. When the licensee approached the bobcat to get a closer look, she growled but did not move from her position in the enclosure. The licensee informed the inspector that she did not eat that morning and is also usually more active. The facility has noticed the issues with the bobcat but has not contacted the veterinarian yet on the health status of the bobcat. The bobcat must be evaluated by a licensed veterinarian for further diagnosis and treatment.

Correct by: April 19, 2018

### 2.50(c)(1)

#### TIME AND METHOD OF IDENTIFICATION.

The facility has five adult wolf dog hybrids that are being exhibited. When asking the licensee, there are currently no method of identification for these animals. The licensee must use an appropriate method of identification for dogs

## Inspection Report

---

being used for regulated activity at the facility.

Correct by: June 21, 2018

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

Records of animals on hand and acquisitions and dispositions of animals purchased since last inspection were not available for review. Records identifying current animals at the facility and records documenting movement of animals into and out of the facility are necessary for tracking of covered species by USDA officials. Records of current animals on hand and acquisitions and dispositions need to be available for review during USDA inspections.

Correct by: June 21, 2018

### 2.131(c)(1)

#### HANDLING OF ANIMALS.

Throughout the facility, there are no public barriers in place for regulated animals. The general viewing public has the potential to walk up to any enclosure. Having this risk can lead to injury or harm to both the animals and general public. Animals must be handled so that there is a sufficient barrier and distance between them and the general public.

Correct by: June 21, 2018

### 3.125(a)

#### FACILITIES, GENERAL.

The enclosure for the facility's fox is made up of linked wires held together by four large wooden posts. On the right side of the enclosure, towards the flooring was a gaping hole large enough to fit a hand through it. This gaping hole poses a risk of injury to both the animal and the general public. Outdoor housing facilities must be in good repair to protect the animal from injury and also contain them.

Correct by: May 4, 2018

This inspection and exit interview were conducted with the facility manager.
