

## Inspection Report

Pymatuning Deer Park Inc  
842 E Jamestown Rd  
Jamestown, PA 16134

Customer ID: **2242**

Certificate: **23-C-0019**

Site: 001

PYMATUNING DEER PARK

Type: ROUTINE INSPECTION

Date: 26-JAN-2016

---

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

The fencing separating the paddocks within the Fallow Deer enclosure is in disrepair. There were several areas where the wire fencing has been broken and there are sharp points protruding from the fence. The facilities shall be maintained in good repair to protect the animals from injury and to contain the animals.

### 3.131(a) REPEAT

#### SANITATION.

\*\*\* The Nialgi enclosure needs to be cleaned. The facility is cleaning out the shelter area every few days, however there was a buildup of waste within the indoor and outdoor enclosure for these animals. This enclosure needs to be cleaned often enough to remove the waste and prevent future accumulations. The waste should be removed to promote the health of the animals and to reduce disease hazards.

\*\*\* The outdoor portion of the lion and tiger enclosures need to be cleaned. Upon inspection there was an accumulation of carcass materials within both enclosures. When providing carcasses, after 24 hours the carcasses should be removed to prevent disease spread and to promote the health of the animals.

The inspection and exit briefing was conducted with the licensee and her animal care staff with ACI- Andrea D'Ambrosio and VMO Dr. Michael Neafsey at the time of the inspection.

#### Additional Inspectors

D Ambrosio Andrea, Animal Care Inspector
