Type: FOCUSED INSPECTION
Date: 31-JUL-2017

No non-compliant items identified during this inspection.

A focused inspection was performed on the dogs identified in the last inspection as requiring treatment. The dogs identified as 146, 196 and 127 had received dental cleanings by the attending veterinarian. The dogs identified as 213, 140 and 142 had been bred at the time of the last inspection and the attending veterinarian decided to delay dental cleanings until the females had whelped. Under the guidance of the attending veterinarian the licensee hand scraped these animals teeth in order to make the dogs more comfortable until further treatment could be provided.

This inspection and exit interview were conducted with the licensee.
