

Inspection Report

Granite State Hedgehogs
406 Central St
Franklin, NH 03235

Customer ID: **6019444**
Certificate: **12-B-0009**
Site: 001
Granite StateHedgehogs

Type: ROUTINE INSPECTION
Date: 10-DEC-2024

2.40(b)(2)

Repeat

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

10 hedgehogs were observed to have excessively long toenails on one or more limbs. Long, curled nails may interfere with normal gait or grow into the paw and cause an injury. The facility must ensure that nails are trimmed regularly to prevent injury.

Corrected during the inspection on December 10, 2024.

3.130

Direct

Watering.

Two hedgehogs did not have water, and together drank for over 2 minutes when a full bottle was supplied. Drinking so enthusiastically and quickly at the same time from one water bottle for such a long period of time indicates that the animals were very thirsty and potentially dehydrated and uncomfortable. The facility must ensure the animals have water as needed for their health and comfort.

Corrected at the time of the inspection on December 10, 2024.

This inspection and exit interview were conducted with the facility representative.
