Type: ROUTINE INSPECTION
Date: 14-NOV-2019

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A 3 year old female mini-golden doodle, microchip #991001000928238, has severe dental disease. There are multiple missing teeth. The remaining incisors (3) have severe gum recession and a mild amount of brown tartar. The canines on the left side have a moderate build-up of brown/yellow tartar. All teeth located behind the canines on the upper and lower jaws, have a significant amount of brown, yellow, green tartar and thick plaque. The gums are reddened. One tooth, near the back of the mouth on the left mandible, has a cream/brown, spongy, pus-like material at the gum line. A lack of dental care can be painful and jeopardize the animals health. Dental disease lead to an increased risk of kidney disease, liver disease, and heart disease.

To be corrected by 11/21/2019

This inspection and exit interview were conducted with the licensee.
