Certificate: 93-R-0117

Site: 001

MOUNT SAN ANTONIO COLLEGE

Type: ROUTINE INSPECTION

Date: 29-MAY-2015

3.131(a)

SANITATION.

There is a moderate accumulation of excreta in the sow pens. The facility representative stated these enclosures are not included on the cleaning schedule that is used for the other pig enclosures. Accumulations of excreta can attract flies and increase disease hazards in animal areas.

A system should be in place to ensure excreta is removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.

To be corrected by June 15, 2015

An exit briefing was conducted with the facility representative.
