BRIDGES FOR BRAIN INJURY INC

Type: ROUTINE INSPECTION

Date: 20-NOV-2014

3.75(e)

HOUSING FACILITIES, GENERAL.

*** The refrigerator storing non human primate diet as well as other animal diets needs to be replaced. The shelf on the inside is cracked, the freezer is not working properly with ice accumulating on the freezer. The fridge is rusted between the freezer and the fridge and the seal has mold. This fridge needs to be replaced to facilitate proper storage of the food supplies and for the health of the animals.

Correct by: Dec 20, 2014

3.81

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

*** The facility has recently acquired a 6 month old ring tail lemur. The animal is housed alone with no access to another non human primate. The animal was engaging in abnormal behavior of sucking its paw repeatedly. While this could be a self soothing behavior if not addressed it could lead to self damaging behaviors and become stereotypic in nature. The facility has a written enrichment plan that mentions additional training time with caretakers but the plan does not address the abnormal behavior the animal is already engaging in. This needs to be addressed for the long term psychological welfare of the animal.

Correct by: Dec 6, 2014

3.131(c)

SANITATION.

*** The facility had several crates that had been used recently to transport animals to shows but had been stored in the animal room dirty. These crates need to be cleaned in a timely manner to facilitate good housekeeping practices.

Correct by: Nov 25, 2014

An exit briefing was conducted with a facility representative at the time of the inspection.
