Type: ROUTINE INSPECTION
Date: 23-JUN-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Two of the juvenile rabbits are each missing one ear. The rabbits were born at the facility approximately five weeks ago as per the facility manager. The facility manager also indicated that both animals' ears were chewed shortly after they were born. The attending veterinarian was never contacted regarding these animals' conditions. The veterinarian must be contacted regarding any veterinary care issues so that the animals can be provided with appropriate veterinary care.

Assure all veterinary care issues are communicated to the veterinarian to provide for the health and well-being of the animals.

To be corrected: From this day forward

3.50(a)

FACILITIES, GENERAL.

The rabbit enclosure and fixtures within it are in disrepair. The fifteen rabbits are housed in an large, fenced outdoor enclosure. The enclosure contains a previously used rabbit hutch that remains within it and is used as shade for the animals. The rabbit hutch has unattached, sharp hardware cloth edges, two boards with sharp nails exposed, and sharp, unattached wiring. All of these hazards are accessible to the rabbits. Additionally, the large enclosure fencing has become unattached from its frame in two areas. Both of these areas are located on the walls near the ceiling. All of these issues are a physical hazard to the rabbits.

Repair, replace, or remove the hazards within/on the rabbit enclosure to provide for the health and well-being of the animals.

To be corrected: 6-30-15

Inspection Report

3.56(a)(1)

SANITATION.

Excessive rabbits feces and other debris are present on the rabbit hutch within the rabbit enclosure. The feces are present along the board of the hutch where sharp wire points are present. Feces can harbor diseases that affect animals.

Clean the hutch or remove it from the larger enclosure to provide for the health and well-being of the animals.

To be corrected: 6-30-15

3.130

WATERING.

The tub containing water for the eight goats and three sheep is dirty. The sides and bottom of the tub are completely covered with algae. The water inside of this dirty tub, if ingested, may make the animals ill. Assure the animals have access to potable drinking water to provide for their health and well-being

Thoroughly clean and sanitize the water tub and repeat often enough to prevent algae build up.

To be corrected: 6-26-15

Note: The inspection was conducted with the licensee and RV campground manager on 6-23-15. A thorough verbal exit briefing was conducted with the licensee. The inspection report was sent by certified and regular mail on 6-24-15. The Cokato location was inspected.
