

## Inspection Report

City Of Santa Ana  
1801 East Chestnut Avenue  
Santa Ana, CA 92701

Customer ID: 3557  
Certificate: 93-C-0101  
Site: 001  
CITY OF SANTA ANA

Type: ROUTINE INSPECTION  
Date: 17-NOV-2015

### 3.52(a)

#### FACILITIES, OUTDOOR.

Rabbits shall be provided with artificial cooling when the temperature exceeds 90 degrees F in outdoor enclosures. In order to provide artificial cooling above 90 degrees F (or 85 degrees F for animals housed inside), a thermometer should be present in the immediate area of the rabbit enclosures. There was no thermometers in the outdoor enclosures to record the temperature and accurately indicate the need for artificial cooling.

Correction date 1 Jan 2016.

### 3.80(a)(1)

#### PRIMARY ENCLOSURES.

In the Saki/Tamarin night house, the cover over the fluorescent light is broken and hanging open, despite the use of duct tape to try and secure it. Fluorescent tubes should be covered to prevent the non human primates from touching the hot tubes or to protect them from debris in case the tube breaks. A system of maintenance must be in place to keep the primary enclosures for non human primates in good repair.

Correction date 15 Jan 2016

### 3.131(c)

#### SANITATION.

In the animal commissary, the floor sealant has worn off in several places, revealing patches of porous concrete. The patches of concrete are not sealed and are not able to be readily cleaned and sanitized. A system of maintenance must be in place to ensure that the kitchen where food is prepared for the animal diets is able to be cleaned and sanitized to prevent contamination of food.

Correction date 1 February 2016

Exit interview conducted with facility personnel.
