

## Inspection Report

Alaska Riverways Inc.  
1975 Discovery Drive  
Fairbanks, AK 99709

Customer ID: **29216**

Certificate: **96-C-0033**

Site: 001

ALASKA RIVERWAYS, INC.

Type: ROUTINE INSPECTION

Date: 18-JUN-2014

### 3.125

#### FACILITIES, GENERAL.

(a)

\*\*\*\*\* At time of inspection the fence located along the river for the reindeer which at times is submerged partially under the water from the river when it rises has rusted and needs replacement. The wire currently used is welded wire and should be replaced with a wire that is better suited for containment of reindeer such as the game fence which the new enclosure for these reindeer is constructed of or a material similar in tensile strength to the game fence.

The support system for the current fence will not be appropriate for whatever type of fence is selected which would be considered adequate to contain reindeer appropriately. A support system which can support the material selected and also withstand partial submersion by the river needs to be erected at time of fence replacement.

TO BE CORRECTED BY: 10/18/14

### 3.127

#### FACILITIES, OUTDOOR.

(b)

\*\*\*\*\* At time of inspection a new primary enclosure for the reindeer had been constructed. This enclosure provided no shelter for the reindeer from inclement weather. A shelter large enough for all animals in the enclosure to have access to if desired needs to be constructed that will provide protection from inclement weather and aid in preventing discomfort to the animals located in this enclosure.

TO BE CORRECTED BY: 10/18/14

This inspection and exit interview conducted by APHIS, USDA, ANIMAL CARE inspector and the designated person for inspection.
