ACTION WILDLIFE FOUNDATION  
INC

Type: ROUTINE INSPECTION

Date: 01-JUN-2021

---

### 3.125(a)

#### Facilities, general.

1. In 2020, a male Elk was observed with a section of wire wrapped around its antlers. The attending veterinarian was contacted and the animal was provided care and sedated in order to remove the wire. Enclosures need to be maintained in good repair in order to prevent injury to the animal. The elk fencing was observed to be in good repair at this time.

2. At the time of this inspection, the fencing for the red deer pasture had two areas where the wire was loose from the support beams, jagged and broken. This can cause harm to the animals should they get caught. Fencing needs to be maintained and repaired when needed to prevent the animals from getting injured or caught. The facility has added this repair to their fencing maintenance plan.

\*\*\*\*\*Correct by July 15, 2021

This inspection and exit interview were conducted with the facility representative.
