### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

The facility has acquired a new cotton-top tamarin but does not have a record of acquisition. This record needs to be obtained and presented on the next inspection.

### 3.75(a)

#### HOUSING FACILITIES, GENERAL.

The enclosure for the two Java macaques suffered hurricane damage and the strong metal areas used for hanging enrichment are no longer supportive. The rope hammock was down and excessively frayed and breaking. One animal was observed chewing on a 12 inch piece of the rope at time of the inspection. The caging needs to be reinforced to support the hanging items.

The shift door into the concrete block night shelter located at the back of the enclosure is extremely difficult to open and close. The shift door is in need of repair. The primary enclosure must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

This inspection and exit interview were conducted with facility representatives.
