ROOSTER COGBURN OSTRICH

Type: ROUTINE INSPECTION

Date: 29-JAN-2016

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

***The licensee did not have records that contained the required information regarding the acquisition and disposition of animals used or co-mingled with animals used in regulated activities. There were no records of acquisition for 31 rabbits that are currently on exhibit to the public. Records containing the required information for animals acquired for use in regulated activities, including those offspring born on premise, need to be made and maintained in order to properly track the animal numbers and use in those activities.

To be corrected by 2/12/16

3.130 REPEAT

WATERING.

***The enclosure housing approximately 50 fallow deer had dirty water receptacles. There was a buildup of green debris on the interior surface of the receptacles along with green debris floating on top of the water. Water receptacles must be maintained in a clean and sanitary condition in order to ensure that the animals are provided with clean, potable water, to minimize disease hazards and to ensure that they maintain adequate hydration. Water receptacles should be cleaned at a frequency that is adequate to maintain standard husbandry practices.

Inspection and thorough exit briefing were conducted with facility owner.
