Customer ID: 857  
Certificate: 64-R-0002  
Site: 001  
TUSKEGEE UNIVERSITY

Type: ROUTINE INSPECTION  
Date: 06-MAR-2015

### 2.33(b)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

\*\*\*In the junior surgery building there were several medications (Atroject 8/14, Naloxone 11/14, Bupivacaine 2/12, Dopram 4/12, Propoflo 9/11 and Diphenylhydramine 11/14) that had expired. Medications that have expired may become more potent or weakened altering their efficacy. All expired medications shall be clearly marked and/or stored separately to prevent accidental use on regulated species. Correct from this day forward.

### 3.125(a)

#### FACILITIES, GENERAL.

\*\*\* On the northwest side of the pasture the fencing containing the cattle was in disrepair. There were three holes in the fencing along the road and there was a large hole under the fencing. This hole was large enough for a medium-sized dog to potentially crawl through. The fencing needs to be repaired or replaced for the safety of the animals. The fencing shall be structurally sound and maintained to keep predators out and to contain the animals within. Correct by March 30, 2015

The inspection and exit interview were conducted with the attending veterinarian.

Prepared By: ANNETTE CHAPMAN, D V M USDA, APHIS, Animal Care
