3.30

WATERING.

Five water bottles had an algae buildup on the inside of the water container. Water receptacles must be kept cleaned and sanitized whenever dirty and at least once every two weeks. Inadequate cleaning of the water receptacles can result in contamination of the guinea pigs in the same enclosure and health problems. Licensee must establish and maintain a program to keep the water receptacles clean when dirty, and receptacles must be sanitized at least once every 2 weeks. Correct by March 29, 2017.

This inspection and exit interview were conducted with the owner.
