Type: ROUTINE INSPECTION
Date: 28-JUN-2017

3.127(d) REPEAT

FACILITIES, OUTDOOR.

A large pasture containing Pere David deer, eland, camels, and cattle is enclosed by a newly constructed eight foot fence. There is no perimeter fence beyond the primary enclosure in the far outer sections of the pasture. Outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out and so that it can function as a secondary containment system for the animals in the facility. Unless a variance is approved in writing by the Administrator, potentially dangerous animals require a perimeter fence at least eight feet high and other animals require a perimeter fence at least six feet high. It must be a at least three feet from the primary enclosure and sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals/people outside.

Records were not reviewed during this inspection.

This inspection and exit interview were conducted with one of the licensees.
