Site: 001

RACHELLE BATESOLE

Type: ROUTINE INSPECTION

Date: 22-DEC-2014

3.125 REPEAT

FACILITIES, GENERAL.

(a) Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

- In the petting zoo area, a shelter housing two goats has multiple exposed sharp points within reach of the enclosed animals. These sharp points are due to a shelter panel being knocked loose from the frame. Sharp metal points are a potential source of injury to enclosed animals and need to be removed or repaired as soon as possible to help protect the animals health and welfare.

Inspection and exit interview conducted with facility representative.
