

Inspection Report

Kameron Bean
733 Cravens Ave.
San Antonio, TX 78223

Customer ID: **324937**
Certificate: **74-C-1034**
Site: 001
Kameron Bean

Type: ROUTINE INSPECTION
Date: 18-AUG-2016

3.126(b)

FACILITIES, INDOOR.

There is a strong smell of ammonia in the building housing the skunks, kinkajou, prairie dogs and opossums. The ammonia level was high enough to cause my eyes and throat to burn upon entering the building. Owner's husband stated the odor was due to the mice housed in the building. Ammonia at a level that causes irritation to a human's eyes and nasal passages can be expected to cause similar irritation and discomfort to the animals. There is a portable AC unit in the building but there is no additional ventilation or fresh air. This room must be properly ventilated and the source of the ammonia (dirty rodent cages) corrected to minimize odors and provide for the health of the animals. CORRECT BY : IMMEDIATELY

3.131(a)

SANITATION.

The floor of enclosure housing the 2 prairie dogs is littered with dirty wet bedding. The sheet covering the floor of the kinkajou enclosure is covered with feces and old food. Dirty bedding and old food are an attractant for flies and pest and a source of diseases. Enclosures must be cleaned as often as necessary to prevent contamination of the animals and to minimize disease hazards. CORRECT BY : 8-19-16

The inspection and exit briefing was conducted by Dr. Pannill - USDA with the owner's husband.
