Type: ROUTINE INSPECTION
Date: 11-AUG-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

*** A Cocker spaniel # 147 has a build up of tarter on the teeth, and the gums are red and irritated. The facility has a plan for dental care in the program of vet care, but this dog has not been identified as needing dental care despite the condition of the mouth. This dog needs to be assessed by the attending veterinarian for treatment. Dental disease can cause pain and health issues in dogs and should be addressed in a timely manner for the comfort and health of the dog.

*** A Bichon # 238 had matted fur around the feet, ears and anal region. There was fecal debris caught in the fur around the anus. Matted fur pulls and separated from the skin and can cause painful skin irritations. This dog needs to be groomed for the comfort and well being of the animal. Grooming is considered preventative care and needs to be done on a routine basis prior to matting of this degree.

*** A Pekingese # 128 was wearing a chain collar that was rusted. There was a considerable amount of hair loss around the neck where the chain was. In addition, there was large areas of matted fur behind the ears. This dog needs to be groomed for the comfort and well being of the animal. Grooming is considered preventative care and needs to be done on a routine basis prior to matting of this degree.

The two matted dogs identified were groomed by the end of the inspection.

2.51(b)(3)

FORM OF OFFICIAL TAG.

*** Currently 105 dogs at the facility have been identified by a name, but have not been identified by a number individual to that animal. Dogs at the facility are required to have tags which identify the facility license number, state USDA and the dogs individual number. Tags must be numbered in sequential order and the number cannot be used more than once in a 5 year period. In addition, the collars used for the dogs must not be made of material that can rust and irritate the skin of the dog. This needs to be addressed for identification purposes.

MINIMUM AGE REQUIREMENTS.

*** A Pomeranian puppy id # 677171 was separated from the litter and sold at 7 weeks of age. Per this regulation, all dogs transported in commerce must be at least 8 weeks of age and fully weaned. This facility must take steps to assure that future sales of all dogs are at the minimum age for the health and safety of the animals.
