Type: ROUTINE INSPECTION
Date: 16-NOV-2017

3.125(a)

FACILITIES, GENERAL.

The large fenced enclosure attached the the big red barn at the back of the facility that houses llamas, donkeys, and a dromedary camel has a red metal trailer box to the left of the pen. The front right corner of this metal structure is rusted and an approximately 6"-8" piece of rusted metal has curled up from the surface and is protruding into the animal area. The edge of this piece of metal appears sharp, jagged, and rusted. Llamas were licking the trailer box in close proximity to the protruding metal. The animals in the pen may be injured by this piece of metal. This should be addressed.

***To Be Corrected By: November 18th, 2017 for a temporary fix - December 1st, 2017 for a permanent fix

3.138(a)

PRIMARY CONVEYANCES (MOTOR VEHICLE, RAIL, AIR, AND MARINE).

The black livestock trailer was noted to have areas on the wheel wells that were rusty. There was an area on the bottom of the right wall that had rusted through. This was just behind the right wheel well and was appropriately 4" x 6" long. These areas will need to be repaired to ensure the health, comfort and safety of the animals being transported.

***To Be Corrected By: December 1st, 2017

3.138(e)

PRIMARY CONVEYANCES (MOTOR VEHICLE, RAIL, AIR, AND MARINE).

The black and red livestock trailers (license plate 19-42673 & 20-5053C) were noted to have soiled bedding and excreta on the floor. These trailers should be cleaned before they are used to transport animals.

*** To Be Corrected By: November 25th, 2017 or before they are used to transport animals, whichever comes first

This inspection and exit interview were conducted with the licensee.
