Type: ROUTINE INSPECTION
Date: 18-DEC-2017

2.75(b)(1) REPEAT

RECORDS: DEALERS AND EXHIBITORS.

The inspectors reviewed the few acquisition and disposition records available for review which were the 2015 acquisition records for the marmosets and an acquisition record for a male spider monkey and a disposition record for a female spider monkey. The following records were missing:

*The acquisition and disposition record for the second spider monkey (facility representative stated she obtained two but then returned one that she was unable to sell)

*The disposition record for the six hedgehogs present during the last routine inspection that the facility representative states she no longer owns.

*The disposition record for the marmosets present during the last inspection and not present during today's inspection.

*The acquisition/disposition records for the animals being sold/exhibited during the Exotic Expo in Cowan, TN on May 20, 2017.

It is important to keep accurate and complete records in order to trace the health and the ownership of animals. The acquisition and disposition records must be complete and include all the required information.

3.77(f) REPEAT

SHELTERED HOUSING FACILITIES.

The sheltered housing for marmosets is not completely surrounded by a six foot perimeter fence. There is only one small portion of the current fencing that meets the perimeter fence requirements. The licensee stated that a variance request was sent to the office approximately six months ago however inspectors checked with the office which has no records of receiving a variance request. The sheltered housing building requires a perimeter fence at least six foot high which is at least three feet from the sheltered building or a variance approved by the administrator. The administrator can approve a fence less than six feet high and less than three feet from the sheltered building. It is important for the protection of the nonhuman primates to restrict access of unwanted animals and unauthorized humans. Apply for a variance or construct a fence.

This inspection and exit interview were conducted with undersigned facility representative.
