SANTA'S WORKSHOP

Type: ROUTINE INSPECTION
Date: 14-SEP-2017

3.125(a)

FACILITIES, GENERAL.

The fence along the south side in the enclosure housing 23 fallow deer and 1 llama is no longer attached along the bottom to the support pole. The fence is pushed inward, the bracket holding the fence to the support pole is no longer attached making this area not structurally sound and in good repair.

Indoor and outdoor facilities shall be structurally sound and maintained in good repair to protect the animals.

To be corrected by: September 21, 2017

3.131(d)

SANITATION.

In the enclosure housing 23 fallow deer and 1 llama a dead baby skunk was observed lying in the shelter. The skunk and other pests can carry and transmit diseases to the animals and poses a health risk. A more effective method of monitoring and preventing in/around primary enclosure should be implemented. Establish and maintain a safe and effective pest control program for the control of insects, ectoparasites, avian and mammalian pests. Removal of the skunk is to be done immediately.

To be corrected by: October 20, 2017

This inspection and exit briefing were conducted with the Maintenance/Animal Caretaker.

Additional Inspectors

Sismour Naomi, Veterinary Medical Officer
