ALLERMED LABORATORIES

Type: ROUTINE INSPECTION

Date: 22-JUN-2016

2.31(d)(5)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

IACUC continuing reviews of activities involving animals. The active protocol 00-002 was not reviewed at the last two semiannual facility inspections/IACUC meetings and the previous modification approval date on the protocol was September 2013. There was no additional documentation indicating the annual review was completed by the IACUC.

One review of the protocol shall be done to record ongoing updates and other modifications that may be necessary for the completion of the study. Facility shall ensure that reviews are appropriately done as determined by the IACUC, but not less than annually. Adequate IACUC review of animal use is necessary to ensure that activities involving animals are being conducted in accordance with the Animal Welfare Act. The IACUC should make certain that all activities relating to the care and use of animals receive adequate oversight.

Correct from this day forward.

2.31(e)(1)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

An IACUC (Institutional Care and Use Committee) approved protocol (00-002) utilizing a regulated species did not identify the approximate number of animals to be used in the study. The IACUC should ensure that a proposal to conduct activities involving animals includes the appropriate information prior to approving the proposal. The approximate number of animals the study proposes to use during a specific time period is important for the IACUC to assess and approve. Additionally, any significant changes (such as the total number of animals used) to activities should have IACUC approval prior to their implementation.

IACUC oversight is intended to ensure that the facility is in compliance with the Animal Welfare Act. Inadequate program oversight may be detrimental to the welfare of the animals used in the program.

Correct by 28 July, 2016.
