Type: ROUTINE INSPECTION
Date: 07-DEC-2017

2.40(a)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***The current program of veterinary care lists an attending veterinarian who has not been to the facility in over a year. The facility is utilizing another veterinarian for puppy checks and routine care consultation. This veterinarian is not listed on the program of veterinary care. The facility needs to designate one veterinarian to oversee herd health of the kennel and who is aware of preventative protocols, treatment plans and dental care. All veterinarians consulted by facility need to be listed on program of veterinary care to ensure attending veterinarian is given the authority to oversee the adequacy of all aspects of veterinary care.

Correct by: December 31, 2017

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***White cavachon puppy in whelping box identified as 17157 had hind right leg held out straight to right side of body in whelping box. Puppy did not appear to have traction on smooth surface of whelping box floor. Puppy was picked up, and did not appear to be able to bend right hind leg. When placed on a concrete surface with better traction, the puppy did not bend leg, pull leg under body, or use leg to ambulate. This puppy may have an injury, and due to the potential severity of injury and age of puppy, this condition should be communicated to the attending veterinarian as soon as possible to mitigate potential negative effects on puppy development.

Correct by: December 8, 2017

3.2(d)

INDOOR HOUSING FACILITIES.

*** Current whelping boxes have areas of wood that has been scratched and chewed and is no longer sealed and impervious to moisture. Additionally, the coating of the wire mesh floors in these enclosures is peeling, exposing bare metal wire. All surfaces in contact with animals should be sealed and impervious to moisture to facilitate cleaning and sanitation.
