Certificate: **58-C-1097**
Site: 001
CAIRO LLC

Type: RE-LICENSE INSPECTION
Date: 19-APR-2022

3.127(d)

Facilities, outdoor.

The front gate attached to the perimeter fence had a 6" gap along its bottom edge and the rear gate had a 10.5" gap along its bottom edge. The perimeter fence had three areas where a burrowing animal (likely a gopher tortoise) created a den directly under the fence line. These burrows created gaps up to 8" deep under the fence. Animals and unauthorized people can use these gaps to enter and exit the area and gain access to the animals behind it. The perimeter fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

To be corrected by the next re-license inspection.

This is a 1st Relicense Inspection for a Class "C" license. The inspection and exit briefing were conducted with the Applicant. All items must be in compliance within 2 more inspections or by June 19, 2022 or the Applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Relicense Inspection. Regulated activity can continue under your existing USDA license until it expires.
